Thanks Anne.

The public meetings were also on our list for students to attend. As part of their grade, they all have to attend at least one public meeting. Some had planned to go in April but have yet to do so since we knew there had been some delays in releasing the Proposed Plan. Hopefully some of the students will see you there at some point.

I'm going to try a few other contacts that Tony suggested after you all. I also have a co-teacher reaching out to Laura Knudsen to see if she's available.

Thanks for your time!

Melanie,

Unfortunately, I am not available next week either. The Proposed Plan for Portland Harbor will be released to the public soon, which will start a 60-day public comment period. During the public comment period, EPA will hold 4 public meetings which will include presentations about EPA's preferred cleanup plan for the site and time for Q&A. The presentations are planned during the lunch hour and in the evenings to accommodate work schedules. I would suggest that you have your class attend one of the public meetings. You can join the Portland Harbor listserv on our [website](#) so that you can be notified about the public meeting schedule.

Thanks,

Anne

Hello Melanie,

This sounds interested and thanks for reaching out. Unfortunately, I will be out on travel that week.

Thanks you for the consideration.

Alanna

Subject: Portland Harbor Class Meeting May 2nd

Hi Alanna, Judy, and Annie,

Tony Barber gave me your names as folks that might be interested in giving a talk at Portland State University to a group of students I'm teaching this term. Our class is focused on comparing the Superfund process in the Portland Harbor and Lower Duwamish. Part of our goal in the class is to expose our students to a variety of different perspectives at each Superfund site, so we have taken the class on field trips to both the Portland Harbor (Port of Portland Site) and last week we visited the Lower Duwamish (Port of Seattle), and talked to a variety of people from EPA, DRCC, the Duwamish tribe, and other community organizers.

The reason I am reaching out to you all is to see if you would be available next week to give a talk during our class period on Monday May 2nd. I was originally going to have Tony speak, Personal Privacy / Ex. 6

Personal Privacy / Ex. 6

The class goes from 1 to 3 pm and I had Tony scheduled for a 45 minute talk with 15 minutes for questions beginning at 1 pm. I also have Sue MacMillan from DEQ coming in that day at 2 pm to talk to the class about risk assessment and PCBs in fish. Sue and I worked together previously as consultants at URS, and she now works at DEQ on air quality issues, but worked on fish and PCBs for a long time before that. In any case, the class schedule is pretty flexible, so if any (or all of you) would be interested in coming to our class and speaking about the EPA's role in the Portland Harbor, how you perceive any differences between the Lower Duwamish and the Portland Harbor, what contaminants the EPA is most concerned about, and what cleanup options the EPA might be leaning towards, we would love to have you. We have quite a few community development majors in our class as well, so I know they would love to hear about EPA's outreach to the community in the Portland Harbor.

Would any of you be available to speak on these topics or others of interest?

Thanks,

Melanie Malone
